Features & Benefits

- "rearTWIST Principle" locking/unlocking Ideal for recessed bulkheads where • access to the "head" of the connector using the easily accessible soft touch boot (Patent DE 100 48507) might be an issue. These connectors turn from the back and not the front. True 75 Ω design meets the stringent Leading area: Avoids tilting due to side • • forces to protect contacts from HDTV / DVD requirements deformation. Guarantees a lifetime of min. 1000 mating cycles! Snug-fit center pin insert provides tactile Shield and jacket crimp technology • feedback prevents the problem of an exposed grounding braid on cable assemblies Excellent cable protection and retention Precise Swiss machined brass parts for • outstanding durability
 - Accessories include color coded boots in 10 standard colors, crimp tool and dies
