

USB C Multiport Adapter - USB-C Mini Travel Dock w/ 4K HDMI or 1080p VGA - 3x USB 3.0 Hub, SD, GbE, Audio, 100W PD Pass-Through - Portable Docking Station for Laptop/Tablet

Product ID: DKT30CHVAUSP

This USB-C multiport adapter turns your MacBook Pro, USB-C laptop, Chromebook, or Android (Samsung Galaxy S8, Note 9 and above) device into a workstation, anywhere you go. A USB Type-C adapter, ideal for travel, features everything from the essential HDMI or VGA video outputs and USB ports to an SD card reader and 100W PD including PD passthrough. All through a single extended length 30 cm, Thunderbolt 3 or USB-C attached host cable, providing more flexibility for harder to reach laptop and tablet connections.

To ensure full adapter functionality, your laptop's USB-C port must support USB Power Delivery and DP Alt Mode.

This USB-C multiport adapter features both an HDMI and VGA port providing you with two single video output options for your boardroom presentations or your workstation setup including support for an ultra-wide monitor.

With support for USB PD 3.0 (up to 100W), the USB Type-C multiport adapter lets you power and charge your laptop, and power your peripherals when connected to a USB-C power adapter. The USB-C hub features PD passthrough so you can use your laptop's own charger to power the hub (requires 15W) and power or charge your laptop simultaneously.

The USB-C to USB 3.0 hub gives you one USB-C port (power & data) and two USB-A ports to connect your latest and legacy USB devices.

Access your multimedia content, audio, and network with ease. The multiport adapter provides direct access to your:

- SD, SDHC and SDXC memory cards or microSD cards via the SD card slot
- Audio content via headphones or microphone through the 3.5mm 4- position audio port
- Ethernet network via the GbE port using a hard-wired connection

DKT30CHVAUSP is backed by a StarTech.com 3-year warranty and free lifetime technical support.
