

VGA Splitter Cable, 2 Way

No.: 41214

Affordable alternative to a VGA video splitter box!

Description

- Allows two VGA monitors to be connected to a single VGA output
- VGA Male to 2 x VGA Female
- Designed for short range desktop installations of up to 10m; for longer distances we recommend you use our
- Gold plated connectors
- Cable length: 18cm

This splitter cable allows two monitors to be connected to a computer's single VGA port. It's a passive cable which simply splits a single VGA signal into two without any amplification or signal regeneration, making it an ideal, cost effective solution for shorter installations.
